

UV LED module

Victory's UV LED modules provide a simple and effective way to build drying and curing systems for all kinds of inks, pigments and adhesive that are UV curable. They combine the benefits of LED — long life and low energy consumption — with the powerful curing properties of ultraviolet light.

Fast, flexible curing and drying

- Wavelength 365 - 405nm
- High intensity
- Air cooled
- LED arrays in lengths made to order
- Instant on/off; no warming/cooling phase
- Dimmable
- Life of over 20,000 hours

Applications

- Ink curing/drying
- Automotive paint drying
- Paint drying in manufacturing
- Curing adhesives
