# Infrared lamps for catering

Clean, efficient heat  
sources for catering

Infrared lamps provide a clean, efficient heat source for the catering industry in equipment such as heated counters and v. Victory Lighting's infrared range includes hard glass, screw-in lamps for standard lamp holders, as well as double-ended, linear lamps for heater fittings.

Victory also supplies lamp holders for those who wish to develop their own equipment.

Victory infrared halogen quartz lamps provide instant heat and so are a highly efficient heat source in shortened operating times.

## Applications

- Restaurants
- Schools
- Pubs
- Hotels
- Hospitals

## Hard glass single ended

Coloured lamps are manufactured from special red doped borosilicate glass, avoiding the use of potentially hazardous lacquers.

Hard glass clear

Hard glass red

PAR

### Clear or red glass

- Red filter version reduces visible light by 75%
- Neck moulded to ensure caps will not come loose
- 5000 hour life
- Universal E27 cap

### Double ended

Victory double ended infrared catering lamps are available in a plug-in, quickfit, format, or with flying leads. Both are available as a bare lamp, or jacketed for extra safety for use in close proximity to food.

Victory jacketed lamps have been proved as the preferred choice in areas like food outlets and serveries, as they offer greater protection against accidental breakage.

## Bare or jacketed

### Bare lamps

- Long life
- Easy replacement

### Jacketed lamps

- Better protection against potential food contamination
- More resilient to impact breaks

## Lamp holders

For OEMs and those wishing to develop their own systems, Victory offers a range of lampholders compatible with its lamps. Victory is thus a one stop shop for infrared heat sources for catering, and the means to install them.
