

VICTORY
ULTRAVIOLET

Your Partner for
UV-C Technology

Explore our Full UV-C Capabilities & Offering

Why Work With Us?

With over 30 years' manufacturing experience in the Infrared & Ultraviolet market, we are committed to bringing this technology to our customers to benefit their business.

WE...

HOLD A WIDE RANGE OF LAMPS IN STOCK

ARE PRICE COMPETITIVE

HAVE EXTENSIVE CROSS REFERENCES

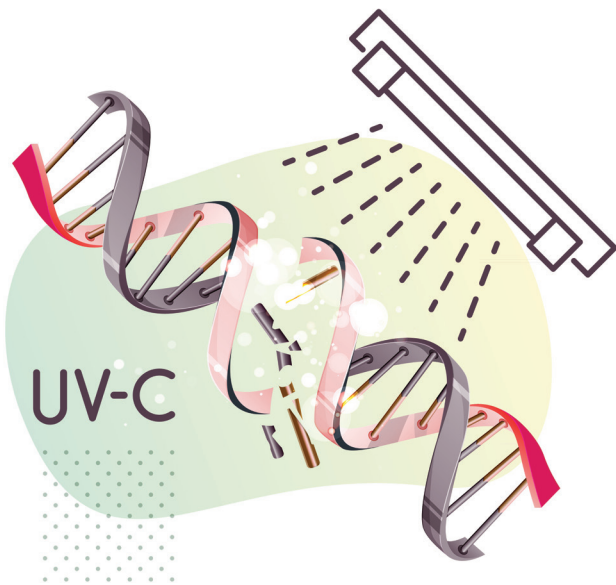

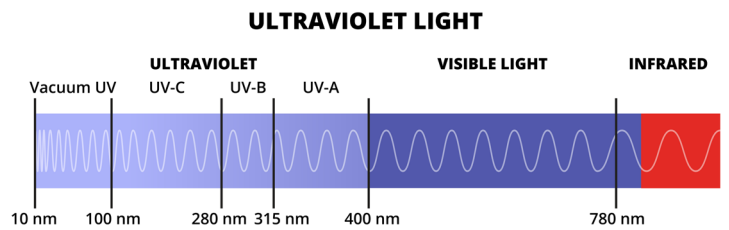

HAVE EXCELLENT TECHNICAL EXPERTISE

With our vast range of UV-C productions & solutions, we are confident that we will have the best offering for you and your business needs.

Discover how our innovative approach can **enhance** your processes, **improve** output, and **elevate** the quality of your products.

How Does UV-C Work?

UV-C light has a wavelength between 200 and 280 nm that is highly effective at destroying the genetic material of bacteria and microorganisms.

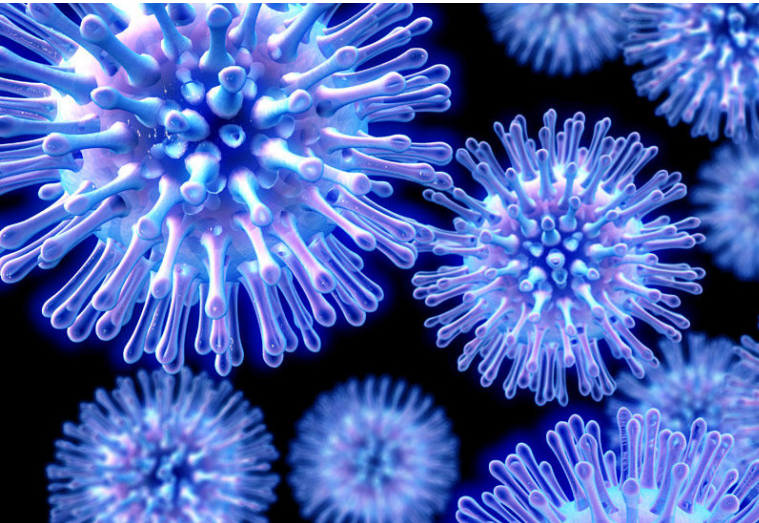

UV-C light is so effective for disinfection as it disrupts the DNA & RNA of microorganisms such as bacteria, viruses and fungi.

The disruption of the genetic material means they cannot reproduce and spread, leaving the area sanitised.

Benefits

There are many benefits of using UV-C

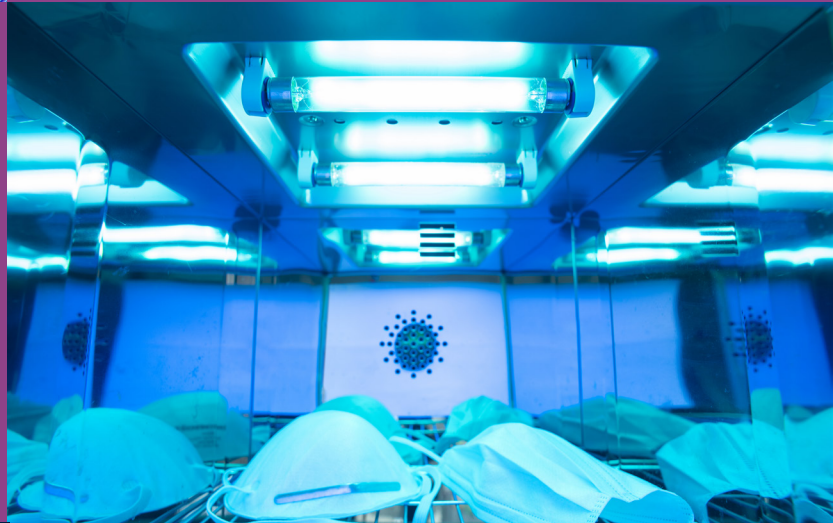

ENERGY EFFICIENT

Highly effective at killing a wide range of bacteria, viruses and mould.

CHEMICAL FREE

Eliminates the risk of harmful and irritating chemicals.

FAST ACTING

UV-C can sterilise surfaces & objects within seconds.

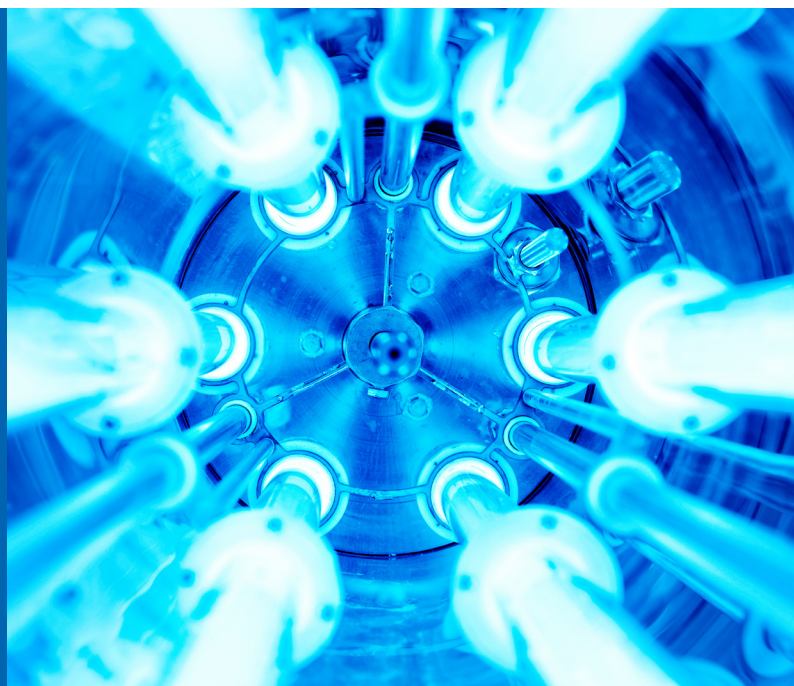

Explore Our Range of UV-C Lamps & Solutions

At Victory, we already manufacture & supply a number of high performing UV-C lamps into a wide variety of industries:

WATER

- Pools & Spas
- Water Treatment Plants
- Drinking Water

AIR

- Air Sterilisation
- Odour Control

SURFACES

- Food Processing
- Crop Enhancement
- Surface Cleaning
- UV Curing

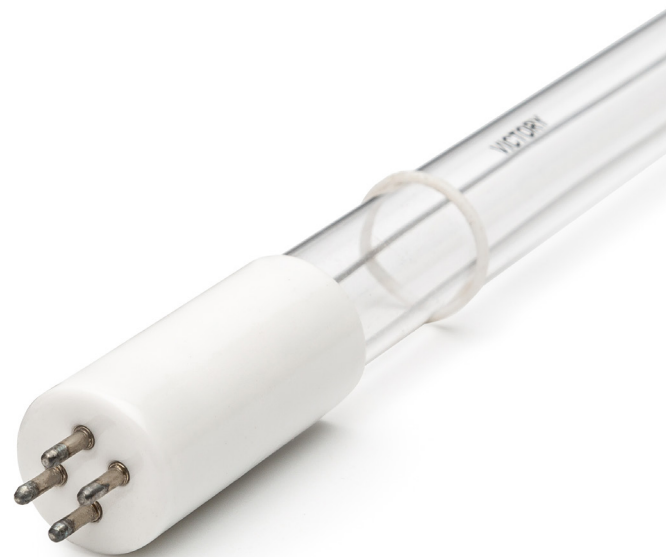

UV Lamps for Water Treatment

We have a range of solutions for treating water with UV light.

Our UV lamps are compatible with all major UV-C systems including the below:

Aquafine	Xylem
Excelitas	Light Tech
Trojan	Light Sources
Heraeus	Berson
Philips	Nuvonic
Wedeco	Hanovia

A Selection of UV-C Lamps Compatible with All Major UV-C Systems

UV-C Lamps for Air Disinfection

UV-C is increasingly used in air purification systems with a number of benefits:

- Quickly & Efficiently kills viruses, bacteria & mould
- Safely protects people without the need for harsh chemicals

Discover Our Out of The Box Air Purification Solution

Our air disinfection system, Bacticlean, is an out of the box solution to help protect you and your team.

It is easy to instal and can be used in a number of different settings and sizes:

- Hospitals
- Laboratories
- Residential Care Homes
- Gyms
- Offices
- And Many More

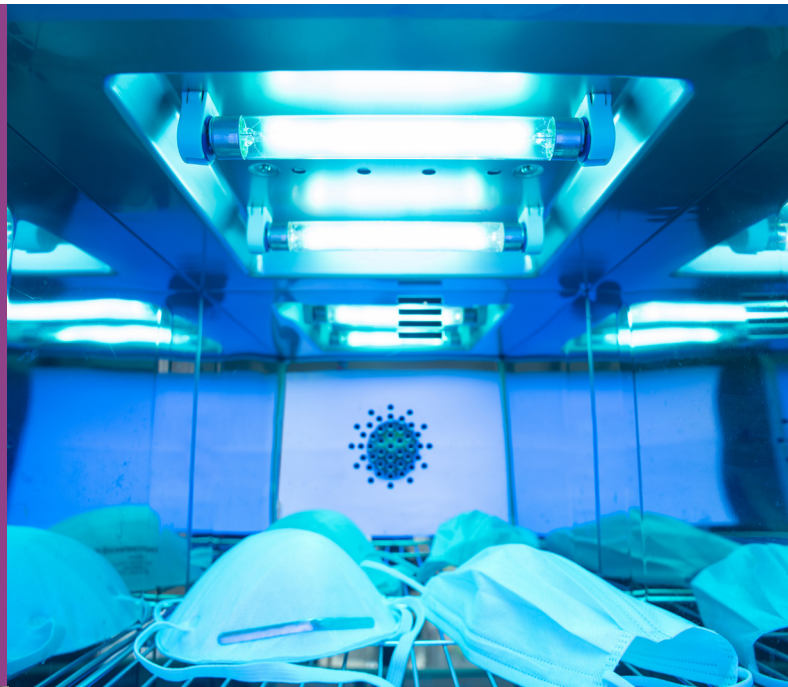

We also manufactrure and supply lamps for existing air disinfection systems.

UV-C For Surface Disinfection

Studies have shown that certain pathogens can survive for days on surfaces, especially in cool and dry environments.

UV-C light can be used to disinfect surfaces in various environments

This process can be used across a number of different industries including:

- Food Processing
- Kitchens
- Healthcare
- Schools
